

LEAVE IT UNREAD WHEN TUCKED INTO BED

More sleep can lead to better grades

1 in 2 MSU students reported experiencing sleep difficulties in the past year.¹

21% reported that it seriously affected their academic performance.¹

Keep in mind:

- Artificial light from technology may decrease melatonin, a chemical in your body that promotes sleep
- Avoiding screen time 30 minutes before bed can make it easier to fall asleep
- “Sleep debt” is real. Getting quality sleep every night prevents ‘crashing’ in the future

Visit bit.ly/msusleep or scan the QR code for resources on improving sleep quality and to learn more about how lack of sleep affects performance.
